Professional Summary

Software Engineer with 5 years of experience building scalable, secure, and high-performance web applications. Skilled in modern frontend and backend development, API-driven architectures, and improving system reliability. Experienced in leading cross-functional initiatives and delivering impactful solutions using React, Next.js, Vue, Node.js, and GraphQL.

Education

Sir. M Visvesvaraya Institute of Technology, Bangalore

2017 – 2021

Bachelor of Engineering in Computer Science

Bangalore, India

Experience

Survey Monkey

Nov 2024 – Present

Software Engineer - II

Bangalore, India

- **Led modernization efforts** for the Enterprise Admin experience by building React-based workflows, advanced filtering, search, and user-management actions, improving usability and overall performance across large enterprise accounts.
- **Integrated GraphQL** and REST APIs while collaborating with backend engineers to refine data contracts, support multi-filter queries, and ensure consistent behavior across admin workflows.
- Delivered **major enhancements** to the Custom Question Bank, including a complete tag-management experience with reusable components, **optimized data-sync logic**, and improved content organization.
- **Improved security posture** by addressing XSS and injection vulnerabilities, sanitizing unsafe inputs, updating dependencies, and adopting secure coding practices.
- Increased platform reliability by **resolving production issues** related to access control, reporting discrepancies, and UI state handling across React and backend integrations.
- **Collaborated effectively** with Product, Design, Backend, QA, and Customer Operations to clarify requirements, validate edge cases, and ensure high-quality delivery.
- **Maintained code quality** with CodeQL, consistently achieved **85%+ test coverage**, and ensured high system reliability by maintaining an SLA of **99.976%** while minimizing production issues.

Mile Tech (prev. Automatad INC)

June 2022 – Oct 2024

SDE - Frontend Engineer

Remote / Bangalore

- **Led development** of reusable design systems and component libraries used across multiple products.
- **Worked extensively** with Vue (2/3) and React, optimizing state management using Redux and Context API.
- **Built customer-facing dashboards** integrating RBAC, dynamic forms, and real-time APIs.
- **Migrated legacy apps** into a Micro Frontend architecture, reducing build times by **over 90%**.
- **Integrated REST and GraphQL APIs** while reducing payload size by **25%** and improving render performance by **15%**.
- **Enabled CI/CD automation** with GitHub Actions for streamlined deployments.

Accenture

Aug 2021 – Jun 2022

Associate Software Developer

Bangalore, India

- **Contributed** to AngularJS-based internal tools and **led migration** to Angular for improved maintainability.
- **Participated** in code reviews, documentation, and engineering workshops focused on cloud-native architecture.

Projects

Vizion | NEXTJS, FASTAPI, MANIM, PYTHON, GEMINI API

- Built an AI-powered educational video generator using Gemini API, FastAPI, Manim, and Next.js that transforms natural language prompts into rendered animation videos.

Personal Portfolio | REACT, TYPESCRIPT, TAILWIND CSS

- Personal website showcasing experience, projects, and technical background.

Technical Skills

Languages/Frameworks: ReactJS, NextJS, VueJS (2 & 3), Redux, Context API, NodeJS, Express, JavaScript, TypeScript, Python, GraphQL, HTML, CSS, Tailwind CSS

Tools: Git, Postman, Yarn, NPM, Vite, Babel, Jest, React Testing Library, GitHub Actions, Linux
