

PRIYANSH SINGH

Senior Software Engineer

✉ singhpriyansh2000@gmail.com [in LinkedIn](#) [GitHub](#) [Portfolio](#)

Professional Summary

Senior Software Engineer with 5 years building enterprise admin platforms, design systems, and full-stack products. Strong in React, TypeScript, Next.js, GraphQL, Python, and Rust. Led admin modernization, security remediation, and production releases.

Education

Sir M Visvesvaraya Institute of Technology, Bangalore
Bachelor of Engineering in Computer Science

2017 – 2021
Bangalore, India

Experience

SurveyMonkey

Software Engineer II, Enterprise Admin

Nov 2024 – Present
Bangalore, India

- **Rebuilt the enterprise teammate management page** in React: invite by email, link, or CSV; search and filter the team; change roles and license types; manage pending invites and export lists.
- **Launched the admin home page** with seat usage, pending invites, and setup guidance; rolled out to US and Canada with in-app walkthroughs.
- **Built custom roles and permissions settings** so admins control who can create surveys, view analytics, or share results; fixed role creation validation and permission edge cases.
- **Fixed a multi-language login bug** for global customers: users who chose Dutch, Japanese, or other languages still landed on English pages; patched the shared auth library and shipped the fix across our web apps.
- **Improved the admin user activity report** (SSO and join-date columns, sorting, pagination) and built a **custom tag editor** for enterprise survey content.
- **Security and release ownership**: remediated XSS, log injection, SSRF, and vulnerable dependencies; raised test coverage to **85%+**; owned deployments across five platform services.

Mile Tech (prev. Automatad)
SDE, Frontend Engineer

Jun 2022 – Oct 2024
Remote / Bangalore

- **Built reusable design systems** and component libraries used across multiple Vue and React products.
- **Worked across Vue 2/3 and React** with Redux and Context API for complex application state.
- **Migrated legacy apps** to a micro frontend architecture, cutting build times by **90%**.
- **Delivered RBAC dashboards** with dynamic forms and real-time APIs; reduced payload size by **25%** and improved render performance by **15%**.
- **Set up GitHub Actions CI/CD** for automated deployments across frontend services.

Accenture

Associate Software Developer

Aug 2021 – Jun 2022
Bangalore, India

- **Contributed** to AngularJS internal tools and **led migration** to Angular for improved maintainability.
- **Participated** in code reviews, documentation, and cloud-native architecture workshops.

Projects

Resume (Next.js, Groq): AI cover letter studio with resume/JD parsing and PDF export.

[Try it here](#)

Betternote (Rust, React, Tauri): Local-first macOS notes with TipTap, Ollama, and Jira integration.

[Try it here](#)

Nest (React Native, Expo): Offline finance tracker parsing bank SMS into SQLite dashboards.

[Try it here](#)

Vizion (React, FastAPI, Python): Text-to-animation pipeline with Gemini and Manim rendering.
